4. Case Studies

Name of the Patient: Naruram Bairwa

Age: 70 Years

Village:-Khedampura Gram Panchayat Moodli

Naruram Bairwa is 70 years old from Khedampura village which is located in Gram Panchayat Moodli, Bassi Tehsil of Jaipur. He is come from lower socio-economic background and facing health issue regarding eye. In the village level there is lack of health facilities in this area. At the time of mobilization Dhara Sansthan team found that he is facing problem regarding his eye vision, and then he came to eye health camp and shown to the doctors. Earlier, he has shown to other doctors regarding his eye disease and take treatment but nothing is improved in his vision. After, coming to eye camp organized by Dhara Sansthan with support of BOSCH he got treatment at ASG Eye Hospital, Jaipur.

After follow up with him and his family member we got to know that he is able to see clearly and not facing any problem with his eye. He and his family member are very happy and thankful toward work done by doctors with support of BOSCH.

Age: 65

Village: Jheeniha

Govindi Devi is 65 years old from Jheenjha village which is located in Bassi Tehsil of Jaipur. She is come from lower socio-economic background and work related to agriculture. At the time of mobilization drive Dhara team meet her and told regarding Eye health camp. She had faced difficulty to see properly and get treatment from different doctors at various places but nothing improved in her condition.

After coming to Eye health camp organized by DharaSansthan with support of BOSCH she got treatment at ASG Eye Hospital, Jaipur. Currently, She is able to see clearly and don't facing any difficulty.

She and her family member are very happy and thankful toward work done by doctors with support of BOSCH

5. Health Screening Camp

Dhara Sansthan in collaboration with Narayana Hospital has been organized health camp at Deogaon of Bassi block, in which oral cancer, hemoglobin, diabetes, blood pressure, Body Mass Index etc has been tested and the report of the same has been printed and given to the patient. Severe identified patients have been referred to the primary health services and counseling has been provided to the patients on nutrition, hygiene and daily exercise. Total 87 people have been benefitted from the camp in which 4 have been referred to Primary health care centre and counseling has been provided to 35 patients who have some kind of lifestyle diseases like hypertension, diabetes or weight disorder etc.
